Phone:  
Ext. 3026

Dear Mr. Geroch:

The amendment of molasses solution was initiated at the former Boeing C-6 Facility on February 23, 2004. During amendment activities on February 23<sup>rd</sup> and 24<sup>th</sup>, molasses solution was observed to be seeping from joints in the concrete floor of an unoccupied building over the injection area. Amendment activities were immediately stopped once the leak was observed. The molasses solution was contained and the solution was vacuumed using an industrial vacuum truck. Approximately 250 gallons of molasses solution was recovered and disposed of as non-hazardous waste. The material was disposed of at DeMenno Kerdoon located in Compton, California.

Project Number:  
CA000594.0003.00005

The situation was corrected and this written notification is provided per the Waste Discharge Requirements (WDR) Order Number R4-2002-0030 (Series 007). In addition, Boeing provided verbal notification to you on February 24 per the WDR.
